*"Providing Solutions to Your Challenges"*

## COMPANY CAPABILITIES

Strategic Visionary Solutions® provides coatings developed using superior technology from nano-based research using highly cross-linked 3D polymers that provide extreme corrosion protection of assets with an overall reduction in maintenance cycles. Our Nano-Clear® family of coatings along with other focused developed coatings will protect surface substrates in industrial, marine, oil and gas, fleet and unique applications. Our coatings can provide a minimum of 10 years of protection from corrosion and UV degradation; disruptive technology in the coating world. If you apply with your own organic personnel, they can be quickly updated on using these products. If you don't apply, we can recommend an application firm or assist your contracted agency. We can provide corrosion consulting services along with program management based upon over 40 years of management and maintenance experience. We will guide you in providing the best solution for your challenge. We are the exclusive distributor of Nano-Clear® products for Michigan. We provide products and services worldwide.

## MISSION STATEMENT

Our primary mission is to provide advanced technology coatings for asset protection and increasing maintenance cycles. We also provide specialized consulting services.
