**RECREATION
VEHICLE RESTORATION**

NANO-CLEAR INDUSTRIAL COATING FOR THAT'S MINOR CUSTOMS RESTORATION

**That's Minor Customs
Clinton Township, Michigan**

Industrial Customer:

That's Minor Customs
Clinton Township, Michigan
POC: Frank Maiorano

Project:

Restoration of an *Ultraslar* recreational vehicle using Nano-Clear® Industrial (NCI) for increased corrosion resistance and reduced maintenance.

Project Location:

Clinton Township, Michigan

Applicator:

That's Minor Customs
Clinton Township, Michigan
POC: Frank Maiorano

Coating Formulation:

Nano-Clear® Industrial (NCI) coating

Application System:

Commercial (HVLP) spray gun

Date:

Application: June 2017
90F (average) sunny, hot, humid

sun damaged paint, paint chips, diesel exhaust particulate damage along with road chemical corrosion resulting in an overall degraded external condition. That's Minor Customs was contracted to restore the exterior and interior spaces of the vehicle to a like-new condition. The vehicle was prepared per standard automotive practices, removing corrosion, fixing cosmetic flaws, in preparation for touchup paint and a final NCI coating. The protocol for NCI coating was followed for this project.

COATING FORMULATION:

NCI – a crystal clear, aliphatic, moisture cured, one component polyurethane/polyuria hybrid formulation with extreme cross-link density for UV, CHEMICAL AND ABRASION RESISTANCE.

NCI is formulated to penetrate and fortify existing paint systems (newly painted or highly oxidized), not replace them.

Applications: Heavy equipment, ships, external structures, fleet equipment, facilities, fences (metal and wood), above ground storage tanks, equipment, bridge rails and signs that have degraded paint/coatings from UV, chemical and abrasion forces.

RESULTS:

The recreational vehicle was fully restored with a protective **NCI** coating that provides it with over 10 years of corrosion and UV protection.
